Immunization Waiver Policy

Michigan has instituted new rules on immunization waivers. Parents and guardians are now required to receive education from local public health prior to waiving any required vaccines. Many diseases that had been eliminated or had become rare are making a comeback. There have been large increases in pertussis (whooping cough), measles, and chickenpox throughout the United States. While many people may only become moderately ill with these diseases, the most vulnerable in our community; infants and those with chronic medical conditions, could suffer serious consequences such as hospitalization and death. Some previously healthy people also have developed these same consequences.

It is our responsibility to ensure that parents/guardians have an opportunity to have their questions answered, discuss concerns, and be offered scientific-based education on the benefits of vaccination and the risks of disease before signing a waiver.

What if you don't immunize your child?

- Your child is at greater risk of catching a vaccine-preventable disease
- Your child may infect others in our community if they come down with the disease
- Your child may be excluded from daycare, pre-school, or school for several days or weeks to prevent them catching or spreading a vaccine-preventable disease

What to do to obtain a nonmedical waiver:

We strongly encourage you to immunize your child, but if you have chosen to waive your child's immunizations, you must make an appointment at the Washtenaw County Public Health Immunization Clinic. The clinic is located at 555 Towner Street in Ypsilanti. To make an appointment, call 734-544-6700.

Please note that the schools will no longer have waivers. You must receive a certified waiver from the health department for it to be a valid waiver.

Medical waivers must be obtained from your doctor. The medical waiver forms can be found at www.michigan.gov/immunize under the Health Care Professionals/Providers link.
