Table B: Achievement Related to Academic Goals

Provide a narrative on progress toward meeting the goals outlined above.

As we reflect on the preliminary fall to winter growth data, we notice that the reading and math growth for our high school students, even as the pandemic continues, and even as our students and teachers are experiencing social-emotional trauma, their academic growth continues at or almost at the level of pre-pandemic national growth norms. This speaks highly of the quality and dedication of our teachers, and for the academic engagement of our students.

As a point of reference, the Michigan Department of Education (MDE) uses student growth percentiles (SGP) from their annual M-STEP and MI-Access test to evaluate instructional effectiveness. The MDE cut scores for the ranges of effectiveness ratings are below the 20th percentile is ineffective, between 20th and 40th percentiles is minimally effective, between the 40th and 60th percentile is effective, and above the 60th percentile is highly effective. NWEA growth percentiles are calculated using the same methodology as the MDE student growth percentiles, so the measurements are comparable. While MDE scales SGP each year, NWEA calculated their growth norms from pre-pandemic data.
